

LYDIA FIKIRE

Front-End Developer | Full-Stack Software Engineer

Addis Ababa, Ethiopia | +251 900 354 454 | lydiafikire05@gmail.com | github.com/lidu5 | linkedin.com/in/lydia-fikire-86b146243

PROFESSIONAL SUMMARY

Front-end-focused Software Engineer with hands-on experience building React and Vue.js interfaces for national-scale platforms used by thousands of end users in government agriculture and health systems. Skilled at turning requirements from non-technical stakeholders into functional, reliable web interfaces, and at working across the full delivery cycle from UI implementation to API integration, testing, and end-user training. Comfortable working with designers and cross-functional teams to translate ideas into polished, production-ready web experiences.

RELEVANT FRONT-END EXPERIENCE

- Built React front-end components for the Planning & Performance Management System (PPMS), a nationwide platform used by every state ministry office in Ethiopia to set targets and track performance indicators.
- Developed the Vue.js front-end for the Digital Health Project Inventory (DHPI) system, delivering an interface used by the Ministry of Health to register, review, and certify digital health projects nationwide.
- Worked directly with ministry stakeholders and end users to gather requirements and translate them into usable interfaces, then delivered hands-on training and ongoing support — direct experience bridging non-technical requirements and functional front-end delivery.
- Tested and validated 50+ REST API endpoints (Postman, Swagger/OpenAPI) feeding production dashboards, ensuring front-end integrations stayed reliable as systems scaled to thousands of users.
- Used Git-based version control across all projects for collaborative, team-based front-end and full-stack development.

WORK EXPERIENCE

Full-Stack Software Engineer

June 2025 – June 2026

Development Gateway (An IREX Venture) — Seconded to the Ministry of Agriculture, Ethiopia

- Developed the React front-end for the Planning & Performance Management System (PPMS), enabling state ministry offices to set annual targets, track KPIs, and auto-generate reports submitted to the Ethiopian Parliament.
- Designed and developed DOVAR, an animal disease registration and tracking system deployed for thousands of farmers and district agricultural specialists across Ethiopia.
- Built the front-end for a Digital Budget Management System used to monitor budget allocations and expenditures across ministry departments.
- Developed an ICT Support Ticketing System interface allowing ministry users to submit and track IT requests.
- Delivered training and ongoing user support to Ministry staff and affiliated organizations on all deployed systems.
- Tested, validated, and documented 50+ REST API endpoints across all deployed systems, reducing production errors and speeding up front-end/back-end integration.
- Set up OpenTelemetry for application monitoring, helping maintain 80% system uptime and enabling rapid detection of front-end and back-end issues.
- Performed SharePoint customization, configuration, and end-user training to improve internal collaboration and document management.

Software Engineer – Digital Health

October 2024 – June 2025

John Snow, Inc. (JSI) — Seconded to Ministry of Health, Ethiopia

- Co-developed the front-end for the Digital Health Project Inventory (DHPI) system using Vue.js, enabling the Ministry of Health to register, quality-assure, and certify digital health solutions nationwide.
- Assisted in designing and developing the National Health Data Dictionary (NHDD) application interface to standardize national health data definitions.
- Provided technical support for DHIS2 dashboard configuration and data analysis for national health monitoring.
- Contributed to improving interoperability between DHIS2 and the eCHIS platform.

TECHNICAL SKILLS

Front-End: JavaScript, React, Vue.js, Responsive UI Development

Back-End: Django, Laravel, C#, REST API Design

Mobile: Flutter, React Native
Databases: MySQL, PostgreSQL
Platforms & Tools: DHIS2, Microsoft SharePoint, Odoo ERP, eCHIS, Git
Other: REST APIs, JSON, Postman, Swagger/OpenAPI, OpenTelemetry, Data Analysis, Dashboard Design, System Integration, User Training

EDUCATION

Bachelor of Science in Information Systems — Addis Ababa University, Ethiopia (2021–2024)
CGPA: 3.75 / 4.00 — Graduated with Distinction

CERTIFICATIONS

- Data Science Foundations – Level 1 — IBM
- Data Science 101 — IBM
- CCNA: Enterprise Networking, Security, and Automation — Cisco

LANGUAGES

Amharic: Native | English: Fluent
